

an@tomedia[™]

A New Approach To Medical Education: Developments in Anatomy.

an@tomedia™ is a unique way to learn about the anatomy of the human body. an@tomedia™ Online is a comprehensive, self-paced learning program that explores anatomy from four different perspectives. an@tomedia™ provides an interactive photographic and illustrated atlas with detailed, serial dissections of real human bodies and coloured overlays that offers more learning possibilities to the learner.

an@tomedia[™] is the perfect resource for medical and allied health schools in universities, colleges, professional associations, hospitals and libraries.

Unlike other anatomy programs, an@tomedia™ examines anatomy from four different perspectives that teach learners how the body is constructed (from regions and systems) and how learners can deconstruct the body (with dissection and imaging techniques):

- DISSECTION:
 - Includes practical procedures and postmortem
- IMAGING:
 Includes sectional and endoscopic anatomy
- SYSTEMS:
 Includes conceptual and clinical anatomy
- REGIONS: Includes surface and functional anatomy

Arranged in nine modules

General Anatomy, Back, Abdomen, Thorax, Pelvis, Upper Limb, Lower Limb, Neck and Head.

Greater flexibility

The interactive text, image overlays, labels and clinical questions enhance the learners ability to explore anatomy at any level of difficulty. Learners will have the flexibility to choose their own approach, rate, sequence and depth of learning.

Comprehensive resource

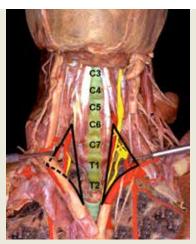

an@tomedia™ features over 5000 images, 70 videos, and 2000 slides that covers detailed serial dissections of real human bodies and clinical procedures in all areas. It provides learners with multiple perspectives to explore and compare anatomy.

Easy to Use

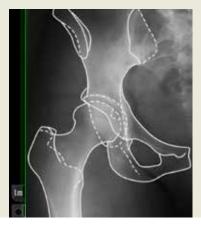

an@tomedia™ provides the capacity to 'build' systems, 'maps' regions, 'dissect' layers and 'trace' images. It has a simple and consistent navigation system.

Trusted content

an@tomedia $^{\text{\tiny M}}$ represents 120,000 hours of work by the author team over a period of 22 years.
